

PRABHU E S

Electronics Engineer & ML Developer

E-mail: prabhu.e.s.tech@gmail.com | Ph.no: +91-9363489226 | Kozhikode, Kerala
linkedin.com/in/prabhues2007 | github.com/Prabhu-E-S | Web: https://prabhues.vercel.app

SKILLS

Languages: C, Python, JavaScript, HTML/CSS, Arduino(C)

Tools/Frameworks: Tailwind, Git, Github, MATLAB/Simulink, TinkerCAD

ML/Data: NumPy, Pandas, Matplotlib, Scikit-learn, XGBoost, Tensorflow, Supervised Learning

PROJECTS

Exoplanet-Detection (Machine Learning)

- Built an AI-enabled exoplanet detection pipeline (Python, XGBoost, Lightkurve, Astropy) to process TESS light curves via BLS transit detection and classification into planet candidates, eclipsing binaries, and false positives.

NITC-Physical Reporting (Web-Dev)

- Built a full-stack queue management system (Flask, SQLite, JS) with OTP-based student/admin portals, token booking, and RESTful APIs.

Robotic-Manipulator (Robotics)

- Designed and simulated a 3-DOF robotic manipulator (MATLAB/Simulink, Python) with numerical inverse kinematics via Damped Least Squares Jacobian, achieving 0.13 mm end-effector accuracy.

Dataset AI Explorer (AIML)

- Dataset AI LLM is a full-stack AI data workspace for uploading tabular datasets, profiling them, cleaning quality issues, asking natural-language questions, training simple ML models, generating predictions, and exporting reports.
- The project includes a FastAPI backend, a React/Vite frontend, PostgreSQL storage, Pandas-based data processing, scikit-learn analytics, and optional Gemini-powered explanations.

WORK EXPERIENCE

Research Intern at BSERC - ISRO Associated

Nov 2025 - Jan 2026

- Completed an ISRO-associated DEF-SPACE Winter Internship, gaining hands-on experience in robotics, aerospace systems, drones, and space technologies through multidisciplinary research projects.
- Collaborated with mentors in a research-driven environment focused on STEM innovation, simulation-based engineering, and space technology applications.

GirlScript Summer of Code (GSSoC'26) | Contributor & Ambassador

May 2026 - Aug 2026

- Contributed to open-source projects by resolving issues, implementing features, and submitting pull requests using Git and GitHub.
- Collaborated with maintainers and developers through code reviews, version control, and issue tracking while promoting the GSSoC community as a Campus Ambassador.

Frontend Developer - Tathva NIT Calicut

Sep 2026 - Present

- Developed a responsive frontend for the Tathva NIT Calicut website using Next.js, JavaScript, and CSS.
- Fixed Frontend issues & implemented interactive features, infinite scrolling, and smooth gallery navigation.

EDUCATION

B.Tech in Electronics Communication Engineering (2025-29)

National Institute of Technology, Calicut (NITC) | CGPA - 9.2

XII (CBSE) - 2025

Subbiah Central School | 95.6%

CERTIFICATES & ACHIEVEMENTS

- Coursera Certified Machine Learning Specialist - DeepLearning.AI & Stanford Online (Andrew Ng)
- Participated in 5+ hackathons, developing solutions in AI, robotics, and full-stack development.
